

Thank you for purchasing a piece of CHANEL costume jewellery.

This piece has been crafted in the finest jewellery - making tradition.

It displays a meticulous attention to detail that is the hallmark of CHANEL creativity and expertise. The quality of your piece is of the utmost concern to us.

This is a luxury product and should be handled with care. We recommend that you take certain precautions in wearing and caring for the piece in order to maintain it in pristine condition for as long as possible.

Wearing your jewellery

Over time, air, moisture and the acidity of the skin may damage the shine on your piece or cause wear to the metal finish or to the colouring and lustre of the costume jewellery pearls.

Please follow the guidelines below to preserve your jewellery in optimal condition:

- Avoid contact with water;
- Avoid exposure to high temperatures;
- Remove jewellery when exercising to protect it from knocks and scratches;
- Remove jewellery when handling corrosive products;
- Apply perfume and makeup before putting on jewellery: certain chemicals found in cosmetic products may discolour or damage jewellery.

Storing your jewellery

Jewellery pieces may scratch upon contact with one another. We strongly recommend that you store and transport jewellery pieces individually in the pouch provided.

Caring for your jewellery

To preserve the shine on your jewellery, rub regularly with a soft cloth.

Do not clean with water, soap, detergent, or any other chemical product or solution, as these could damage the metal finish or discolour the piece.

Over time, the thread in strings of pearls may loosen, which increases the risk of breakage. Should this occur you may need to have your pearls rethreaded. If you have any queries, or require any further information on jewellery care, please contact your nearest CHANEL boutique.
