

Congratulations on your purchase of a pair of CHANEL shoes. Crafted in the finest shoe-making tradition using semi-artisanal techniques, these shoes are made for walking, roaming and dancing. If properly maintained they will give you many years of service.

THIS IS A LUXURY PRODUCT AND SHOULD BE TREATED WITH THE GREATEST CARE.

- Soft leather, kidskin and lambskin shoes should be regularly treated with leather care shoe polish and gently shined with a cloth. To allow the leather to breathe, do not apply an excessive amount of polish. Use colourless polish on two-tone shoes to prevent staining.
- Patent leather should be cleaned with a sponge wet with soapy water. Wipe dry with a soft, clean cloth. Keep light-coloured patent leather away from dark materials that risk staining it.
- Suede lambskin and calfskin should be gently brushed along the grain with a sponge or a special cloth for suede. Before brushing remove stains with fine-grain sandpaper.
- Shoes made from iguana, lizard and python are highly sensitive to moisture. Treat them with tiny amounts of colourless polish, taking care to leave the scales intact.
- Dab damp shoes dry with an absorbent non-pilling cloth. Do not store near a heat source and do not expose to direct sunlight.
- Before storing, place your shoes on a shoetree and leave to air

out before returning them to their original shoebox. Never store your shoes in a room that is damp or subject to extreme fluctuations in temperature.
